Professional Summary

Information Engineering student at HAW Hamburg with experience in Python software development, technical support, Linux environments, automation and engineering problem solving. Strong background in software engineering, embedded systems, digital electronics and data processing through university projects and industry internship. Seeking a student assistant position where programming, experimentation, documentation and research support intersect.

Technical Skills

Programming	Python, Java, C, C++, JavaScript, HTML, CSS
Engineering	VHDL, Embedded C, Digital Electronics, Signals & Systems
Software	Git, GitHub, VS Code, Microsoft Office, Excel
Technologies	Linux, Windows, REST APIs, JSON, OCR, Web Scraping
Soft Skills	Technical Documentation, Problem Solving, Teamwork, Analytical Thinking

Education

B.Sc. Information Engineering

Oct 2024 – Present

Hamburg University of Applied Sciences (HAW Hamburg)

Relevant Coursework: Programming, Software Engineering, Data Structures, Signals & Systems, Embedded Systems, Digital Electronics, Computer Networks, Engineering Mathematics.

Professional Experience

Software Support Intern

2024

Heartsun Technology Pvt. Ltd.

- Supported Python-based healthcare ERP software and resolved technical issues.
- Developed Python automation scripts for repetitive business processes.
- Performed software testing before production deployment.
- Documented software defects and collaborated with developers.
- Worked with structured datasets, APIs and backend workflows.

Technical Projects

OCR Document Processing System

- Built an OCR pipeline using Python, Tesseract OCR and pdf2image.
- Automated scanned PDF conversion into searchable digital documents.
- Improved document processing efficiency through automation.

Secure Messaging Application

- Developed an AES-256 encrypted messaging application in Python.
- Implemented secure encryption and key management.

Instagram Data Collection Tool

- Designed a Python automation tool for structured public profile data extraction.
- Implemented robust exception handling and organized exported datasets.

University Engineering Projects

Java Software Engineering

- Implemented binary trees, graph traversal algorithms, sorting algorithms, collections, recursion and GUI-based applications.
- Applied object-oriented programming, modular software design and debugging.

Digital Electronics (VHDL)

- Designed combinational and sequential digital circuits.
- Developed arithmetic logic modules and verified functionality through simulation.

Signals & Systems

- Applied Fourier Transform, Laplace Transform, convolution and sampling theory to analyse engineering systems and applied practically with MATLAB.

Certifications

- SAP Learning – Introducing the Banking Industry
- Meta – Introduction to Front-End Development
- Python Bootcamp – TechTrix 2023

Leadership & Activities

- Organizer, TechTrix 2023
- Volunteer, Kathmandu Trash Collection Initiative
- Participant in the Social Entrepreneurship Bootcamp
